

DEKALB® TOP PRODUCTS: 2019

DKC61-54RIB BRAND BLEND

- Very good yield potential in Northern IL
- Great choice for poorly drained, high OM soils
- Excellent emergence, plant health and late season standability
- Increase populations in high yield environments

DKC62-52RIB BRAND BLEND

- Strong yield potential across yield levels with good drainage
- Foliar fungicide can improve late season health and intactness
- Can provide excellent greensnap tolerance
- Good stress tolerance and drydown

DKC63-21RIB BRAND BLEND

- Excellent agronomics with very strong top-end yield potential
- Good fit for corn on corn with adequate nitrogen
- Plant higher populations for top end yield potential
- Strong standability can allow flexibility at harvest and responds to high management practices

DKC64-34RIB BRAND BLEND

- Amazing performance in 2016 and 2017 from this DEKALB® Disease Shield™ product!
- Broadly adapted to fit on many different soils, but excels on better soils
- Shows flex at lower populations but responds positively to higher populations, especially in high yield environments
- Excellent Goss's Wilt score allows placement on affected acres

DKC64-87RIB BRAND BLEND

- Ole faithful. Broadly adapted to many soil types and yield levels
- Has shown excellent plant health and agronomics with exceptional drydown
- Well suited to corn on corn systems
- Responds well to high management with fungicide, higher N, and higher pops, but holds its own under low management as well

DKC66-74RIB BRAND BLEND

- Excellent top-end yield potential
- Place on better soils to maximize performance
- Has shown excellent stalk and root strength
- Offers strong disease tolerances as expected from a DEKALB® Disease Shield™ product

AGRONOMIC RATINGS
